

## 2017 ROSÉ

The Simple Life Rosé is distinct and intentionally made in an understated style. Skin contact was minimized to promote fruit forward aromas, bright flavors, and a stunning pale, rose gold color. Minimizing grape skin contact also helps build a wine with soft tannins that lets the acidity and minerality shine through.

### WINEMAKING

As grapes were received at the winery they were immediately pressed and fermented in stainless steel tanks at cold temperatures. No oak was used during fermentation and the resulting wine did not go through malolactic fermentation. This wine is meant to showcase fruit from the premier California vineyards individually selected for this Rosé wine.

### TASTING NOTES

This elegant and dry wine is a glimmering rose gold color in the glass. Bright aromas and flavors of wild strawberry, rose petal, pear blossom and jasmine floral notes are inviting. The wine is fresh and delicate with a juicy fruit palate and balanced acidity. This Simple Life Rosé will pair well with a wide array of foods or is delightful to sip on its own.

### PHILOSOPHY

We treasure this small town, California life and its simple pleasures - like walking downtown and shopping at family-owned grocery stores, cooking with fresh ingredients from local farms, and drinking wine made by our family and friends who have been here for generations. We created these wines for the people that enjoy the simple things in life; friends, family and a glass of wine.
